INFORMATION ABOUT THE NORTH CAROLINA REGISTER AND ADMINISTRATIVE CODE

NORTH CAROLINA REGISTER

The *North Carolina Register* is published bi-monthly and contains information relating to agency, executive, legislative and judicial actions required by or affecting Chapter 150B of the General Statutes. All proposed, administrative rules and amendments filed under Chapter 150B must be published in the Register. The Register will typically comprise approximately fifty pages per issue of legal text.

State law requires that a copy of each issue be provided free of charge to each county in the state and to various state officials and institutions. The *North Carolina Register* is available by yearly subscription at a cost of one hundred and five dollars (\$105.00) for 24 issues.

Requests for subscriptions to the *North Carolina Register* should be directed to the Office of Administrative Hearings, P. O. Drawer 27447, Raleigh, N. C. 27611-7447, Attn: *Subscriptions*.

ADOPTION, AMENDMENT, AND REPEAL OF RULES

An agency intending to adopt, amend, or repeal a rule must first publish notice of the proposed action in the *North Carolina Register*. The notice must include the time and place of the public hearing; a statement of how public comments may be submitted to the agency either at the hearing or otherwise; the text of the proposed rule or amendment; a reference to the Statutory Authority for the action and the proposed effective date.

The Director of the Office of Administrative Hearings has authority to publish a summary, rather than the full text, of any **amendment** which is considered to be too lengthy. In such case, the full text of the rule containing the proposed amendment will be available for public inspection at the Rules Division of the Office of Administrative Hearings and at the office of the promulgating agency.

Unless a specific statute provides otherwise, at least 30 days must elapse following publication of the proposal in the *North Carolina Register* before the agency may conduct the required public hearing and take action on the proposed adoption, amendment or repeal.

When final action is taken, the promulgating agency must file any adopted or amended rule for approval by the Administrative Rules Review Commission. Upon approval of ARRC, the adopted or amended rule must be filed with the Office of Administrative Hearings. If it differs substantially from the proposed form published as part of the public notice, upon request by the agency, the adopted version will again be published in the *North Carolina Register*.

A rule, or amended rule cannot become effective earlier than the first day of the second calendar month after the adoption is filed with the Office of Administrative Hearings for publication in the NCAC.

Proposed action on rules may be withdrawn by the promulgating agency at any time before final action is taken by the agency.

TEMPORARY RULES

Under certain conditions of an emergency nature, some agencies may issue temporary rules. A temporary rule becomes effective when adopted and remains in

effect for the period specified in the rule or 180 days whichever is less. An agency adopting a temporary rule must begin normal rule-making procedures on the permanent rule at the same time the temporary rule is adopted.

NORTH CAROLINA ADMINISTRATIVE CODE

The North Carolina Administrative Code (NCAC) is a compilation and index of the administrative rules of 25 state agencies and 38 occupational licensing boards. The NCAC comprises approximately 15,000 letter sized single spaced pages of material of which approximately 35% is changed annually. Compilation and publication of the NCAC is mandated by G.S. 150B-63(b).

The Code is divided into Titles and Chapters. Each state agency is assigned a separate title which is further broken down by chapters. Title 21 is designated for occupational licensing boards.

The NCAC is available in two formats.

- (1) Single pages may be obtained at a minimum cost of two dollars and 50 cents (\$2.50) for 1 page or less, plus fifteen cents (\$0.15) per each additional page.
- (2) The full publication consists of 53 volumes totaling in excess of 15,000 pages. It is supplemented monthly with replacement pages. A one year subscription to the full publication including supplements can be purchased for seven hundred and fifty dollars (\$750.00). Individual volumes may also be purchased with supplement service. Renewal subscriptions for supplements to the initial publication available.

Requests for pages of rules or volumes of the NCAC should be directed to the Office of Administrative Hearings.

NOTE

The foregoing is a generalized statement of the procedures to be followed. For specific statutory language it is suggested that Articles 2 and 5 of Chapter 150B of the General Statutes be examined carefully.

300 North Salisbury Street
Raleigh, North Carolina 27603-5903
Telephone: (919) 733-3217
FAX: (919) 733-8443

The State Auditor is a constitutionally elected official of the State of North Carolina. He is the administrative head of the State Auditor's Office and is a member of the Council of State.

The State Auditor is the independent auditor for state government and all audits are conducted under the authority of Article 5A of General Statute 147 and the Federal Single Audit Act of 1984. An important part of the audit function is the annual audit of the general purpose statements included in the State of North Carolina's Comprehensive Annual Financial Report. This is an annual report that is widely circulated throughout the nation and is heavily relied upon by bondholders and federal authorities. Another equally important audit function is the Single Audit. The State Auditor's Office is responsible for the auditing of all federal monies that flow both through and to the state, ensuring compliance with the federal and state guidelines. This report is also performed on an annual basis.

In addition, the State Auditor's Office conducts performance audits on state programs and activities and reports on the economy, efficiency and

effectiveness of operations along with whether they achieve intended results.

The State Auditor's Office also has a telephone "Hotline" for receiving reports of alleged instances of fraud, waste, and abuse in state government. That number is (919) 733-3276. The "Hotline" division is dedicated to the investigation of these alleged violations to determine if, in fact, fraud, waste, or abuse has occurred or is occurring in state government.

The State Auditor's Office employs 151 people and is managed by the State Auditor and the Chief Deputy State Auditor. The audit staff is comprised of approximately 135 professionals and is supervised by two Deputy State Auditors and six audit managers.

The State Auditor also administers the North Carolina Firemen's and Rescue Squad Workers' Pension Fund. The fund has a current membership of 25,067 active and 5,614 retired members. The Pension Fund telephone number is (919) 733-3275.

NORTH CAROLINA DEPARTMENT OF ECONOMIC AND COMMUNITY DEVELOPMENT

The Department of Economic and Community Development was established as part of the State Government Reorganization Act of 1971. At that time, the Department consisted almost entirely of regulatory agencies and Employment Security Commission.

In 1977, the economic development divisions, state ports, and energy programs were merged into the Department of Economic and Community Development. Thus, for the first time, all major state government programs designed to develop and promote economic development in North Carolina were consolidated within one department.

The regulatory agencies use their authority independently of the Economic and Community Development department, including holding hearings and engaging in rule making. The department provides administrative services for those regulatory agencies.

Among the Department's most important non-regulatory agencies are its five Economic Development Divisions. Supervised by the Secretary and the North Carolina Board of Economic Development. The divisions are:

STATEMENTS OF ORGANIZATION

Business/Industry Development Division. This division is North Carolina's lead industrial recruitment and business assistance agency. Its staff works closely with other public and private development organizations to encourage the growth and expansion of North Carolina's existing companies, as well as to attract new industries to the state. The Division operates a statewide office in Raleigh and nine regional field offices.

International Division. As its name implies, the department's International Division is primarily responsible for North Carolina's foreign trade. With representatives in Tokyo, Japan, Dusseldorf, West Germany, Hong Kong and Toronto Canada, the division helps foreign firms interested in establishing new business operations in North Carolina, and assists Tar Heel firms in marketing products and services overseas.

Travel and Tourism. The division promotes North Carolina as a vacation destination. The purpose of the division is to increase travel expenditures in North Carolina, create additional employment and personal income for those employed by the Travel Industry, and to strengthen the overall economy of the state. This is achieved by conducting the state travel advertising campaign, servicing travel inquiries, and producing a public relations program on behalf of the state. Sports Development is a new aspect of this division.

Film Office. Established in 1980 to encourage and assist motion picture and television production activity throughout the state, the office operates as a specialized unit of economic development under the direction of the Secretary. Primary targets of the office's recruitment program are major Hollywood studio productions, television commercials, and independent theatrical and television films.

Other non-regulatory agencies housed within the Department of Economic and Community Development and important to North Carolina's overall economic development are:

State Ports Authority. North Carolina operates state ports at Wilmington and Morehead City and leases operation of a small harbor at Southport as well as the Charlotte Intermodal Terminal in Charlotte. Ships from most of the world bring or pick up goods at the Morehead City and Wilmington Ports. Under the direction of **The State Ports Authority Board**, the State Ports Authority promotes the use of North Carolina's ports, oversees construction of faci-

ties at the ports, and operates ports services, such as cranes to unload the goods off the ship.

Energy Division. Duties and responsibilities are to serve as the principal agency in state government to promote energy efficiency, prepare and implement emergency energy plans, prepare energy forecasts, provide energy information, support the Energy Policy Council, and provide energy policy support to the Governor.

Employment Security Commission. Administers the North Carolina Employment Service, North Carolina's unemployment insurance program, and prepares labor market information.

The Commission's Employment Service provides job placement services to all members of the public, including interviewing, counseling, testing, job development, and referral. Specialized services are available to the handicapped, the aged, youth, veterans, and to migrant and seasonal farm workers. The Employment Service is also involved in the administration of such federal programs as Work Incentive (WIN), Veterans Employment Service (VES).

The unemployment insurance program provides benefits to workers unemployed through no fault of their own. The ESC determines entitlement to benefits and makes payments to eligible claimants. The agency also administers federal unemployment insurance programs such as Federal Supplemental Benefits (FSB); Special Unemployment Assistance (SUA); Unemployment Compensation for Federal Employees (UCFE), and others.

The Labor Market Information division of ESC statistical department compiles figures on unemployment and employment in wages, projected occupational needs, and other data. This information is used by federal and state officials, planners, and prospective employers for a variety of purposes.

Technological Development Authority. Provides direct seed capital financing for North Carolina small businesses developing new or improved products and processes. The authority also provides direct grants to nonprofit community-based organizations establishing small business 'incubator' facilities designed to house and support new small businesses in their earliest stages of development.

REGULATORY AGENCIES

Regulatory agencies housed in the Department of Economic and Community Development include:

Alcoholic Beverage Control Commission. Responsible for controlling all aspects of the sale and distribution of alcoholic beverages in North Carolina. The State's system is unique among the 50 states because of more than 152 separate county and municipal ABC Boards which are responsible for the sale of alcoholic beverages in the counties of cities or the State. In each case a vote of the people was required to establish the system.

Banking Commission. Regulates and supervises the activities of the 49 banks and their 874 branches chartered under the laws of North Carolina. The Commission is responsible for the safe conduct of business; the maintenance of public confidence; and the protection of the banks' depositors, debtors, creditors, and shareholders. The staff of the Office of Commissioner of Banks conducts examinations of all state-chartered banks and consumer finance licensees; processes applications for new banks, applications for branches of existing banks, and all applications for licenses. In addition, the Office of Commissioner of Banks supervises the state's bank holding companies, Sale of Checks Act licensees, and pre-need burial trust fund licensees.

Burial Commission. Supervises and audits 280 North Carolina mutual burial associations, which have approximately one-half million members. A mutual burial association is a nonprofit corporation that pays a limited amount toward burial expenses.

Cemetery Commission. Regulates and supervises the activities of cemeteries, cemetery management organizations, cemetery sales organizations, cemetery brokers, and individual pre-need cemetery sales people licensed under the laws of North Carolina. Its principal function is to conduct examinations of all licensed cemeteries. It also authorizes the establishment of and licenses cemeteries, cemetery sales organizations, cemetery management organizations, cemetery brokers, and pre-need salespeople.

Credit Union Commission. Supervises and regulates the operations of 192 state chartered credit unions, which serve over 450,000 members. Its staff conducts annual examinations of all credit unions to insure proper bookkeeping and compliance with the law.

Industrial Commission. Administers the Workers' Compensation Act (NC G.S. 97-1, *et seq.*); the State Tort Claims Act (NC G.S. 143-291, *et seq.*); and the Law Enforcement Officers', Firemen's and Rescue Squad Workers' Death Benefit Act (NC G.S. 143-166.1, *et seq.*). Additionally, the Commission has been charged with the responsibility for administering the Childhood Vaccine-Related Injury Compensation Program (NC G.S. 130-422, *et seq.*), effective October 1, 1986. The Commission administratively handles approximately 200,000 claims per year and conducts trials in nearly 5,000 contested claims annually.

Rural Electrification Authority. Supervises 28 electric membership corporations and 9 telephone membership corporations in the state to see that they apply their rules and regulations on a non-discriminatory basis to individual North Carolinians. It also acts as an ombudsman for member complaints and as the liaison between the membership corporations and the United States Rural Electrification Administration for federal loans. All loan applications must first have the approval of the North Carolina Rural Electrification Authority Board before they can be considered by the federal Rural Electrification Administration.

Savings Institutions Commission. Regulates and supervises savings and loan associations chartered under the laws of North Carolina. Its principal functions are to supervise and to examine all state-chartered savings and loan associations and to process applications for new charters, branches, mergers, and acquisitions.

Utilities Commission. Regulates rates of various utilities. It also investigates customer complaints regarding utility operations and services. The seven member Commission has jurisdiction over public electric, telephone, natural gas, water and sewer companies, passenger carriers, freight carriers, and railroads.

Utilities Commission Public Staff. Created by the legislature in 1977, the Public Staff represents customers in rate cases and other utilities matters. This independent staff appears before the Commission as an advocate of the using and consuming public.

Together, the Economic and Community Development Department's regulatory and non-regulatory agencies now employ approximately 2,600 workers; roughly 2,000 of these are housed in the Employment Security Commission. The Department's annual budget, not including Em-

STATEMENTS OF ORGANIZATION

ployment Security, totals around \$70,000,000, roughly \$9,250,000 of which is federal funds. The Employment Security Commission, which is funded entirely by the federal government, operates on an annual budget of approximately \$67,000,000.

In summary, the North Carolina Department of Economic and Community Development serves the public in a variety of ways.

By recruiting new industry, encouraging the development of small businesses and other existing firms, and promoting tourism and international trade, the Department encourages the creation of new jobs and other forms of economic opportunity which contribute to North Carolina's overall quality of life.

Through the Employment Security Commission, the Department administers North Carolina's unemployment insurance program and provides free job placement services for North Carolina citizens.

Finally, Economic and Community Development's regulatory agencies work to assure fair and equitable treatment for consumers and producers throughout the state's economy.

NORTH CAROLINA DEPARTMENT OF LABOR

The Department of Labor is an independent executive agency created under Chapter 95 of the North Carolina General Statutes. The department is responsible for promoting the safety, health and general well-being of the industrial population of the state. The department administers and enforces health and safety regulations, wage and hour laws, apprenticeship regulations, mine and quarry regulations, elevator, amusement device and aerial passenger tramway regulations, boiler and pressure vessel regulations, regulations for private employment agencies, the hazardous chemical right-to-know law and the migrant housing law. In addition, the department offers arbitration and mediation services for labor management disputes.

The Commissioner of Labor, who is a member of the Council of State and elected by the people of the state for a term of four years, is the executive and administrative head of the department. The Commissioner is assisted by an assistant commissioner and a special assistant for productivity.

The department is organized into three major groups, each under the supervision of a deputy commissioner. These groups are Administration and Regulation, Education and Training, and Health and Safety.

The Administration and Regulation Group is supervised by the Chief Deputy Commissioner. This group is composed of the Arbitration, Conciliation and Mediation Division, the Private Personnel Service Division, the Research and Statistics Division, and the Wage and Hour Division.

The Arbitration, Conciliation and Mediation Division works to promote permanent labor-management peace and to protect the interests and rights of labor, management, and the people of the state by the prevention and prompt settlement of labor disputes. The division offers (1) voluntary arbitration services of labor disputes through its voluntary arbitration panel, (2) conciliation and mediation services in labor disputes, (3) educational services in labor relations, and (4) technical services in labor relations.

The Private Personnel Services Division regulates and licenses private personnel services and job listing services by enforcing the provisions of the Regulation of Private Personnel Services Act and the Regulation of Job Listing Services Act.

The Research and Statistics Division compiles and publishes comprehensive data on occupational injuries and illnesses in the state. The division also assembles and publishes monthly data on building activity in North Carolina by county and by cities.

The Wage and Hour Division enforces the minimum wage, overtime, wage payment, and youth employment laws of the state. The division investigates worker complaints and collects back wages due employees.

The Education and Training Group is organized into two divisions: Apprenticeship and Training, and Pre-Apprenticeship.

The Apprenticeship and Training Division promotes and monitors a broad range of apprenticeship programs designed to train journeyman-level craftworkers to meet the demands of industries for high-skilled workers. Apprenticeship programs are established with private employers or under the sponsorship of labor-management committees. Apprenticeships combine on-the-job experience with related technical training furnished by the individual employer or at a technical institute or community college. The division establishes standards, approves apprenticeship programs which meet established criteria, is a records depository and issues completion certificates to citizens who complete apprenticeship training.

STATEMENTS OF ORGANIZATION

The Pre-Apprenticeship Division promotes opportunities for skills training through on-the-job training programs, pre-apprenticeship programs, and skills up-grading programs. Division representatives meet employers to help design skill training programs designed to meet the employers' needs.

The Health and Safety Group is organized into six divisions: the Boiler and Pressure Vessel Division, the Elevator and Amusement Device Division, the Mine and Quarry Division, the Occupational Safety and Health Division and the Right-to-Know Division.

The Boiler and Pressure Vessel Division regulates the construction, installation, repair, alteration, inspection, use and operation of vessels subject to the Uniform and Pressure Vessel Act of North Carolina. The division conducts periodic inspections, monitors inspection reports by certified insurance company inspectors, and issues operating certificates to owners and operators whose equipment is found to be in compliance with the act.

The Elevator and Amusement Device Division is responsible for the proper installation and safe operation of all elevators, escalators, workers' hoists, dumbwaiters, moving walks, aerial passenger tramways, amusement rides, inclined railways and lifting devices for persons with disabilities which operate in public establishments and private places of employment.

The Mine and Quarry Division enforces the Mine Safety and Health Act of North Carolina. The division conducts a program of inspections, education and training, technical assistance, and consultation to implement the Act. The division also assists mine and quarry operators to comply with the provisions of the 1977 federal Mine Safety and Health Act.

The Occupational Safety and Health (OSH) Division administers and enforces the Occupational Safety and Health Act of North Carolina which is a broadly inclusive law that applies to most private sector employment in the state, and to all agencies of state and local government. The division also administers a program for the registration and inspection of housing provided to migrant agricultural workers. In addition to enforcing the state OSHA standards, the program offers free consultative services, education and training opportunities, and engineering assistance to employers under its jurisdiction. The OSH Division also administers the Safety Awards

Program which recognizes private firms and public agencies which achieve and maintain good safety records.

The Right-to-Know Division administers the North Carolina Hazardous Chemicals Right-to-Know Act of 1985 which requires all users of hazardous chemicals in amounts of at least 55 gallons or 500 pounds to provide lists of these materials to local fire chiefs.

Six advisory groups assist the Commissioner with policy development and program planning. These are the Apprenticeship Council, the Board of Boiler and Pressure Vessel Rules, the Industry Advisory Board, the Mine Safety and Health Advisory Council, and the Occupational Safety and Health Advisory Council, and the Private Personnel Services Advisory Council. A separate unit independent from the Department of Labor is the Occupational Safety and Health Review Board, which hears appeals of citations and penalties imposed by the OSH Division and whose members are appointed by the Governor.

THE DEPARTMENT OF CRIME CONTROL AND PUBLIC SAFETY

The Department of Crime Control and Public Safety (CC&PS) was created in 1977 when the General Assembly passed legislation to restructure the Department of Military and Veterans Affairs. As its name implies, CC&PS is comprised of essential State services related to the well-being of North Carolina's more than seven million citizens.

The Department serves as the State's chief protector and defender of the general public. Agencies of the Department enforce State laws--in particular those involving alcohol, drugs and traffic--assist local agencies in preventing crime, and work to maintain an effective criminal justice system.

The Department also protects the State's citizens from natural and manmade emergencies. By conducting public awareness programs and training, and by preparing emergency response plans, CC&PS strives to prevent injuries and deaths. The Department coordinates the State's response to emergencies and directs relief efforts to disaster victims.

The Department consists of the Office of the Secretary; four commissions: the Governor's

Crime Commission, the N. C. Crime Victims Compensation Commission, the N. C. Emergency Response Commission, and the Governor's Advisory Commission on Military Affairs; and nine divisions: Alcohol Law Enforcement, Butner Public Safety, Civil Air Patrol, Crime Prevention, Emergency Management, the staff of the Governor's Crime Commission, N. C. National Guard, State Highway Patrol and Victim and Justice Services.

ALCOHOL LAW ENFORCEMENT

The Division of Alcohol Law Enforcement (ALE) enforces the State's laws governing the sale, purchase, manufacture, transportation, and possession of intoxicating liquors and controlled substances. Anyone who sells beer, wine or alcohol in North Carolina must have a license. Before that license can be issued, an ALE agent must investigate the applicant and the place where the products will be sold. Once the license is granted, ALE agents check back periodically to ensure that no liquor or drug laws are being violated.

With the passage of the Safe Roads Act of 1983 and the drinking age change law of 1986, ALE is making a special effort to reduce the sale of alcohol to anyone under the age of 21. ALE agents routinely conduct undercover operations to determine if licensed outlets are selling to minors or intoxicated patrons.

Enforcement is one part of an ALE agent's job. Public education and awareness are also important. ALE agents conduct Driving While Impaired (DWI) Source Prevention seminars at which employees of outlets are instructed about the irresponsible serving of alcohol. Agents also speak to community, church, civic, professional, and school groups about alcohol laws and regulations.

BUTNER PUBLIC SAFETY

Butner Public Safety officers are trained to perform a variety of functions, and their jurisdiction covers some 35 square miles. Officers patrol the streets of Butner and the grounds of government operations located there. They provide police and fire protection to the State and federal facilities, including the 4,600 acre National Guard Training Range and the Butner Federal Correctional Facility, as well as the residential, business, and industrial community of Butner. An officer is also equipped with a drug dog, a Belgian Malinois, trained to search for narcotics.

The division traces its roots to the Camp Butner Fire Department set up in 1942 when Camp Butner was established as a U. S. Army Training Camp. In 1947, the State purchased the property from the federal government for \$1 and went about creating a center for the mentally ill, later named John Umstead Hospital. As the complex and community grew, the staff was trained as both firefighters and policemen and the unit was renamed the Public Safety Department. It was transferred from the Department of Human Resources to CC&PS in 1981, and was renamed the Butner Public Safety Division.

CIVIL AIR PATROL

The Civil Air Patrol (CAP) is a volunteer organization and an official auxiliary of the United States Air Force. The CAP has three missions of service to the public: emergency services, including communications, aerospace education and training, and a cadet training and motivation program. The CAP's best known activities are its search and rescue missions for missing or downed aircraft, and its providing of disaster relief assistance during emergencies.

CAP personnel play a vital role in the State's emergency plan. Personnel fly aircraft for transportation and provide aerial photography and courier services. The Civil Air Patrol's communications system provides back-up communications during disasters.

CAP also promotes aerospace education. Interest is encouraged by membership in the CAP cadet program, which is a strong part of CAP's service to North Carolinians. It gives men, women, boys, and girls opportunities for leadership and education through aviation. Cadets regularly participate in drills and exercises to test each squadron's readiness to respond to a call for assistance.

There are 39 squadrons in the North Carolina CAP wing. Many CAP members operate their own airplanes and fly at their own expense. Membership dues, donations, grants, estates, State funds, and Air Force reimbursements account for a large portion of the CAP budget.

CRIME PREVENTION

The Crime Prevention Division works to prevent crimes against property, crimes of violence, and juvenile crimes in North Carolina. The division provides crime prevention education to the citizens of North Carolina through various organizations including law enforcement, schools,

community groups, and the news media. The goal is to get citizens involved in the fight against crime by establishing school, community, county and statewide crime prevention programs.

Staff members of the Crime Prevention Division keep track of changing crime trends and stay abreast of the latest State and national crime prevention programs. In addition to providing technical assistance to reduce crime, crime prevention specialists work toward reducing the fear of crime.

A variety of crime prevention programs are promoted and coordinated by the division. These include Community Watch, Crime Prevention in Public Housing, Crime Prevention in Business, Sexual Assault Prevention, Child Safety, Crime Stoppers, Youth Against Crime, Think Smart, and others. A variety of materials are available, free of charge, from the division.

EMERGENCY MANAGEMENT

The Division of Emergency Management is responsible for protecting North Carolinians from the effects of disasters, natural and manmade. The division offers assistance to local and county officials through the State office and six area offices strategically located across North Carolina. Division personnel coordinate with local governments to develop emergency action plans for such hazards as chemical spills, fires, floods, tornadoes, hurricanes and nuclear incidents. These plans are routinely tested by communities during drills and table-top exercises with the assistance of the division's training staff.

When an emergency arises or a disaster threatens, the State's response is directed by the State Emergency Response Team (SERT). Representatives from every State agency serve on the team, which works out of the Emergency Operations Center (EOC) in Raleigh.

The Division operates the North Carolina Center for Missing Persons. Personnel trained in missing persons cases and search techniques are ready to respond in an emergency. The Division of Emergency Management administers and provides staff to the N.C. Emergency Response Commission. The Commission was formed as required by the Superfund Amendments and Reauthorization Act, known as SARA. This act concerns emergency planning and community right-to-know laws for potentially harmful materials. The 15-member Commission is responsible for reviewing local emergency response plans to handle these materials in the event of an acci-

dent at hazardous waste or chemical plants in the State.

GOVERNOR'S CRIME COMMISSION

The Governor's Crime Commission is the chief advisory board to the Governor and the Secretary of Crime Control and Public Safety on crime and justice issues.

The Commission is made up of 40 members, including the heads of statewide criminal justice and human service agencies as well as representatives from the courts, law enforcement, local government, and the Legislature. Juvenile justice officials and concerned citizens also serve on the Commission.

As a coordinating and planning body, the Commission studies issues and make reports to the Governor on a wide range of criminal justice subjects and has been a force in the passage of such laws and programs as North Carolina's tough Driving While Impaired Law, Community Service Work Program, Community Watch Program, and Rape Victim Assistance Program. Community-based alternatives to prison, in-school suspension, juvenile court counselors, and computerized criminal justice information systems were also recommended by the Commission.

The staff of the Governor's Crime Commission is responsible for researching the issues under review by the Commission and writing the resulting reports to the Governor, including a biennial legislative agenda which recommends statutory changes in criminal laws.

The Division responds to daily requests for crime data and related information from other State agencies, the public, and the news media. Additionally, the Commission administers three federal grant programs totaling more than \$11 million annually. These projects provide program funds in juvenile justice, victims services, drug enforcement, and criminal justice system improvements.

NORTH CAROLINA NATIONAL GUARD

The North Carolina National Guard, with its more than 13,500 members, has a dual role. It is a federal reserve force subject to the call of the President to perform national defense missions. The Guard is also on call at the Governor's request on the State level.

Under the direction of the State Adjutant General, Guard soldiers are trained and equipped with the military's most up-to-date weapons and aviation systems.

As part of its peacetime mission, the National Guard assists the public in times of emergency or civil disorder. Guard aviation units support local governments in searching for missing persons, assisting law enforcement personnel with aerial searches for marijuana, fighting forest fires, and carrying drinking water to communities suffering from drought or contaminated water supplies.

The North Carolina Army National Guard has more than 12,000 personnel assigned in over 100 communities statewide. The North Carolina Air National Guard, with units in Baden and Charlotte, has more than 1,500 personnel. Also under the direction of the State Adjutant General is the State Defense Militia, a volunteer organization which assists the State in emergencies or when Guard units are called to active duty.

NORTH CAROLINA HIGHWAY PATROL

Since 1929, the North Carolina State Highway Patrol has provided for the public safety by enforcing motor vehicle and criminal laws on State roads. The Patrol is the largest State law enforcement agency, with more than 1,200 uniformed members and more than 300 non-enforcement support personnel. It is a proud organization with a rich history.

The Patrol is divided into eight troops with headquarters in Greenville, Fayetteville, Raleigh, Greensboro, Salisbury, Newton, Asheville, and Monroe. Each headquarters has its own garage and communications center. That network provides statewide communications for all State, county, and local public safety agencies.

The Highway Patrol Training Center in Raleigh provides a rigorous Basic School for cadets and continuing education programs for all Patrol personnel. Cadets undergo extensive training in all law enforcement subjects--including constitutional and criminal law--and are taught defensive and pursuit driving techniques on a modern track.

One of the Patrol's primary goals is to remove impaired drivers from the highways. "Operation Eagle", a special enforcement program, has helped the Patrol set records for drunk driving arrests. The Patrol's Interstate Enforcement Team delivers concentrated traffic law enforce-

ment, accident investigation, and related services on North Carolina's nearly 1,000 miles of interstate highway. The team is specially trained in finding and arresting drug traffickers.

State Troopers provide many necessary services to North Carolina, such as assisting stranded motorists, directing traffic at public events and providing security for the Governor and visiting dignitaries. The Patrol also plays a vital role in the State's emergency response plan. With its highly mobile force, the Patrol is one of the first State agencies to respond to emergencies.

VICTIM AND JUSTICE SERVICES

The Division of Victim and Justice Services administers statewide victim and community service programs. The victim programs include the Crime Victims Compensation Program. This program reimburses persons who suffer uninsured medical expenses and lost wages as a result of being crime victims. Victims may receive a maximum of \$20,000, plus an additional \$2,000 for funeral expenses if the victim dies from the crime. Claims must be submitted to the N.C. Crime Victims Compensation Commission for verification and approval.

Victims of rape and sexual assault may receive up to \$500 in financial assistance through the Rape Victims Assistance Program. This program also underwrites a standardized rape evidence collection kit that is used by hospitals to collect evidence.

The community service programs include Driving While Impaired Community Service, First Offender Programs (Misdemeanor and Felony Division), Court-Ordered Community Service, and Community Service Parole. The Division has field offices in each of the 36 judicial districts in North Carolina to administer these programs. The field staff is responsible for placing defendants in local, State, and non-profit agencies to perform free work as a condition of their suspended jail sentences, deferred prosecution, or parole.

225 North McDowell Street - Cooper Building
P.O. Box 27687
Raleigh, NC 27611-7687
(919) 733-2293

The Division is responsible for implementing the North Carolina Coastal Management Program for the protection, preservation, orderly development and management of the state's twenty coastal counties. The Division provides staff support to the Coastal Resources Commission and Coastal Resources Advisory Council created by the Coastal Area Management Act (CAMA) of 1974 (G.S. 113A-100 et seq.). The Division processes major development permits; determines consistency of state and federal grants and projects with the North Carolina Coastal Management Program; prepares guidelines for local land use planning in the coastal counties; administers grants to local governments for planning, permitting and beach access programs; and manages coastal reserves as natural areas for research and education.

ORGANIZATION

Permitting and Enforcement This section is responsible for securing and reviewing state, federal and public comments on CAMA major development permit application, drafting proposed decision documents, maintaining permit file, and reviewing federal agency actions, grants, and per-

mit decisions for consistency the North Carolina Coastal Management Program. Field services are provided from four regional district offices located in Elizabeth City, Washington, Morehead City and Wilmington. The field staff handles direct contact with CAMA major development permit applicants, including on-site evaluations of permit applications, and supports local government administration of the CAMA minor development permit program. The field staff is also responsible for enforcement actions against violators of permit conditions and other CAMA rules.

Policy and Planning This section provides technical support for the Division and Coastal Resources Commission. Raleigh staff conducts studies and administers grants necessary to support program operations, develops and evaluates proposed rules and policies for CAMA implementation, and reviews proposed revisions to Area of Environmental Concern designations. Field staff provides technical assistance to local governments for land use planning, beach access, and other local planning and management projects. The section assists in development of policy relating to such issues as wetlands, marina siting, public trust waters, cumulative impacts and resource evaluation.

Coastal Reserves This section is responsible for the identification, acquisition, and management of critical coastal natural areas to be preserved in a natural state for future research and education. Located in Wilmington, the unit also coordinates research and education activities for six reserve sites: Zeke's Island, the Rachel Carson Reserve, the Currituck Banks Reserve, Masonboro Island, Permuda Island, and Buxton Woods.

Public Information. This unit is responsible for education and public information services, including media contacts, presentations, workshops, newsletters, journals, brochures, and related materials.

COASTAL RESOURCES COMMISSION

The Coastal Resources Commission was created to administer the Coastal Area Management Act of 1974. The Commission consists of 15 members appointed by the Governor to provide expertise and experience on different subjects related to coastal management.

The Commission is responsible for developing a management program for the coastal area by designating Areas of Environmental Concern in the 20 coastal counties by adopting policies,

standards and guidelines for coastal development and natural resource protection, and by approving local governments' land use plans (N.C.G.S. 113A-104).

COASTAL RESOURCES ADVISORY COUNCIL

The Coastal Resources Advisory Council consists of not more than 47 members. The Council assists the Secretary of Environment, Health, and Natural Resources and the Coastal Resources Commission in an advisory capacity on technical questions relating to the development of rules and policies, and other matters arising under the Coastal Area Management Act (N.C.G.S. 113A-105).

COASTAL RESERVE ADVISORY COMMITTEES

An Advisory Committee has been formed for each fully acquired Coastal Reserve under the Coastal Reserve Program. Each committee includes local officials, scientists, educators, adjacent landowners and site users. Reference to these advisory committees is included in 15 NCAC 70 .0104.

DIVISION OF ENVIRONMENTAL
MANAGEMENT
P.O. Box 29535
Raleigh, NC 27626-0535
(919) 733-7015

The Division is responsible for comprehensive planning and management of the state's air, surface water, and groundwater resources. The Division issues permits to control sources of pollution; monitors compliance at permitted facilities; evaluates ambient environmental quality; and pursues enforcement actions for violations of environmental regulations.

ORGANIZATION

Air Quality Section. The Air Quality Section conserves and protects the State's air resources. The section develops air quality standards and emission control standards, and monitors air contaminant sources. The section administers the federal regulations which have been delegated to the State by the Environmental Protection Agency. By implementing the State and federal regulations designed to prevent significant deterioration, the section preserves the quality of clean air and the potential for continued economic growth.

Water Quality Section. The Water Quality Section strives to maintain the quality of the

State's surface waters at levels sufficient to protect their best intended uses. The Section performs four major functions: water quality monitoring which provides data for permit issuance and compliance, water quality assessments and special projects; computer modeling which evaluates the impacts of proposed discharges and recommends protective wasteload allocations; permitting which sets permissible pollution levels for both discharging and nondischarging wastewater treatment systems; and planning which updates and maintains water quality standards and classifications and administers the State's nonpoint source pollution program. The Section will also initiate technical assistance or enforcement actions to correct permit or standards violations.

Laboratory Section. The Laboratory Section provides analytical services to support the air, water and groundwater programs in the Division through two regional laboratories and a central laboratory. The regional laboratories are primarily responsible for bacteriological and biochemical analyses. The central laboratory provides a much broader range of chemical analyses. The Laboratory Section administers a certification program for commercial, municipal, and industrial laboratories performing wastewater analyses for permit holders. The laboratory staff also provides consultation assistance and limited training to municipalities and industries.

Groundwater Section. The Groundwater Section protects groundwater quality and promotes the wise management of the resource. The program objectives are threefold: 1) to prevent pollution by limiting the potential for the discharge of pollutants to the groundwaters; 2) to restore groundwater quality where impacted by man's activities; 3) to understand the factors and conditions affecting the use and availability of groundwater.

The section issues permits for certain classes of wells and registers water well contractors and pump installers.

Construction Grants. The Construction Grants Section helps local units of government finance wastewater pollution control facilities. It administers both the EPA Construction Grants Program and the Federally seeded State Revolving Fund (SRF) program which provide funding for wastewater treatment facilities. The Section provides technical review and certification for State funds under the N.C. Clean Water Revolving Loan Program. It also serves as a resource to local communities for providing

diagnostic evaluations of wastewater treatment facilities through the Municipal Compliance Initiative program. The Section also operates a Small Communities Outreach program to assist the State's smaller communities to achieve solutions to their wastewater treatment problems.

WASTEWATER TREATMENT PLANT
OPERATORS CERTIFICATION
COMMISSION (WWTPOCC)

The purpose of the WWTPOCC is to protect the public health and to conserve and protect the quality of the water resources of the State. The Commission protects the public investment in wastewater treatment facilities by classifying wastewater treatment plants and requiring, through examination and certification, competent plant operators. North Carolina law creates the WWTPOCC and empowers the Commission to adopt rules with respect to the certification of treatment plant operators.

ENVIRONMENTAL MANAGEMENT
COMMISSION

The Environmental Management Commission is created and empowered under Chapter 143B-282 of the General Statutes of North Carolina. The seventeen member commission promulgates rules necessary to protect, preserve, and enhance the water and air resources of the State. Included in its duties are, the authority to grant permits and orders to control sources of air and water pollution; permit and inspect dam construction; establish water and air quality standards and classifications; protect the land and waters from oil pollution and leaking underground storage tanks storing oil or hazardous substances. The Commission investigates water and air pollution incidents and may assess penalties for violations of water and air standards.

DIVISION OF LAND RESOURCES
P. O. Box 27687
Raleigh, NC 27611
(919) 733-3833

The Division of Land Resources is a Division of the Department of Environment, Health, and Natural Resources which is created by G.S. 143B-279 and G.S. 143B-275. The purpose of the Division of Land Resources is to protect and conserve the State's land, minerals, and related resources through the effective implementation and management of programs related to sedimentation pollution control, mined land reclamation, dam safety, land records management, geodetic survey, and mineral resources inventory, analysis, conservation, and development.

ORGANIZATION

Geodetic Survey Section. The primary activity of the Geodetic Survey Section is to place precisely positioned, monumented survey points, often called stations, marks, or benchmarks, throughout the State for use in boundary surveys, chart making, transportation systems and other related activities. These survey points become a part of the North Carolina Coordinate system, which is an X and Y grid covering North Carolina.

Geological Survey Section. The Geological Survey Section examines, surveys and maps the geology of the State and publishes reports and maps for the private sector and the general public. The Section also administers the Oil and Gas Conservation Act.

Land Quality Section. The program provides leadership and assumes primary responsibility for preventing and controlling forest fires on more than eighteen million acres in the state. North Carolina averages approximately 5000 wildfires annually with many areas in the state subject to large, disastrous fires. Close coordination with forest industries, rural fire departments, the Division of Emergency Management and numerous other concerns is an essential part of this program. This program also provides training support to volunteer fire departments.

Forest Management. The objective of this program is to ensure adequate forest resources to meet the current and future needs of the state. This program provides professional and technical management assistance available to all North Carolina forest landowners which involves a detailed examination of the woodlands including the determination of the types, quality and quantity of trees; age, vigor, and general growing conditions of the trees; and general overall situation of the resources. A written management plan recommending, for instance, reforestation

plans, water quality and erosion control, intermediate or final harvesting, prescribed burning and various other forest practices is prepared for the landowner. Information is also provided on several cost sharing programs available for reforestation. The Division has developed an interagency program which emphasizes total management of all forest resources including wildlife, aesthetics, recreation, soil and water, and timber. The Forest Stewardship program is available to all landowners of the state.

Pest Control. The objective of this program is to minimize loss of resources to forest pests and disease. The program identifies and takes control actions as warranted on endemic forest pest and disease problems in the state, and also works closely with other agencies in developing improved means to lessen damages from these activities.

Urban and Community Forestry. The goal of Urban and Community Forestry for North Carolina is to improve the quality of life, (environmentally, economically, and aesthetically) in urban areas through technical assistance and services to towns in developing and carrying out multi-year management plans for urban vegetation. The production of 30 to 35 million seedlings per year occurs at three nurseries and one greenhouse.

Educational State Forests. The purpose of this program is to make N. C. citizens more aware of the importance of forestry by means of programs and demonstrations at several state forests. These forests are located at Clayton, near Lenoir, Elizabethtown, near Wilkesboro and Hendersonville. Programs are provided annually to more than 50,000 school children with total visitation close to 100,000 people.

NORTH CAROLINA DEPARTMENT OF THE SECRETARY OF STATE

The Secretary of State is a constitutional officer elected to a four-year term by the citizens of North Carolina at the same time as other elected executive officials. He heads the Department of the Secretary of State which was created by the Executive Organization Act of 1971. The Secretary of State is a member of the Council of State and is an ex-officio member of the Local Government Commission and Capital Planning Commission. He also serves on the Information Technology Commission (formerly the Computer Commission) and is chairman of the Constitutional Amendments Publications Committee.

By statute he receives all ratified bills of the General Assembly as well as the original journals of the state Senate and state House of Representatives.

The Secretary of State is empowered by law to administer oaths to any public official of whom an oath is required. He is frequently called upon to administer oaths to officers of the Highway Patrol, judges and other elected officials.

The Secretary of State is required to faithfully perform the duties assigned him by the Constitution and laws of North Carolina. The Department of the Secretary of State, under the direction of the Secretary of State, is charged

STATEMENTS OF ORGANIZATION

with maintaining certain records pertaining to state and local government actions and the commercial activities of private business. This duty is imposed by many widely distributed sections of the General Statutes of North Carolina and involves varying degrees of responsibility from reviewing of documents for conformity to statutory requirements prior to filing to enforcement authority. The Department has responsibility under approximately fifty separate statutes which may be divided into categories dealing with custodianship of the Constitution and laws of the State, administrative commercial law, the elective process, the General Assembly and public information.

General Administration Division

The General Administration Division, under the supervision of the Secretary of State and his chief deputy, is responsible for all administrative and management functions including budget, personnel, planning and coordination. In addition, the Division handles miscellaneous statutory duties and responsibilities not assigned to one of the other departmental divisions. Included among these are the registration of lobbyists, the registration of trademarks, and the recording of municipal annexation ordinances.

Corporations Division

The Corporations Division is responsible for filing corporation and limited partnership documents as required by the laws of North Carolina. The various corporation and limited partnership laws are enabling statutes under which these organizations are created. The responsibility of the Secretary of State is to ensure uniform compliance with such statutes, record information required as a public record, prevent duplication of corporate names and furnish information to the public.

The division is responsible for maintaining records on approximately 150,000 current corporations and limited partnerships. The Information Services Group handles more than 700 inquiries daily regarding the records and the unit processes more than 50,000 documents each year.

Notary Public Division

The function of issuing commissions to notaries public was transferred to the Department of the Secretary of State from the Office of the Governor under the Executive Organization Act of 1971. The primary purpose of the Notary Public

Division is to provide a means for establishing the authenticity of signatures. This is accomplished through the issuing of commissions to notaries public in all of the counties in North Carolina.

Publications Division

The Publications Division is primarily responsible for the compiling and publishing of information which will be useful to the General Assembly, to state agencies, and to the people of North Carolina. In addition, it is also responsible for maintaining for public inspection, certain records for which the Secretary of State is custodian. The division publishes such useful items as the *Directory of State and County Officials of North Carolina*, the *North Carolina Manual*, and other smaller publications.

Within the Publications Division is the Land Grants Section where the historical land grants for North Carolina dating from the 1660's are found. Also in this section are the original ratified acts of the General Assemblies of North Carolina, as well as primary and general election voting results for recent elections. In an effort to preserve and protect these valuable records, the Publications Division is working with the state Archives to microfilm the land grant records and transfer them to the state Archives for permanent keeping.

The Securities Division

The Securities Division is responsible for administering the state's securities laws. These "blue sky" laws, as they are known, are provided for in Chapters 78A, 78B, 78C, and 78D of the General Statutes. The intent of these laws is to protect the investing public by requiring a satisfactory investigation of both the people who offer securities and of the securities themselves. The laws provide for significant investigatory powers and for due process in any administrative, civil or criminal action. The Securities Division is the appropriate state agency for addressing investor complaints concerning securities brokers, stockbrokers, investment advisors, or commodity dealers, and for inquiring about offerings of particular securities or commodities. Although the division cannot represent an investor in a claim for monetary damages, the staff can investigate alleged violations and suspend or revoke a license, issue stop orders against securities offerings, issue cease and desist orders, seek court ordered injunctions, or refer the matter to the appropriate district attorney for criminal prosecution.

The Secretary of State, as the state's securities administrator, is a member of the North American Securities Administrators Association (NASAA). Through this organization the division's staff assists in the adoption of nationwide, uniform policies on securities. The Division works with other state securities agencies, various federal agencies (including the Securities and Exchange Commission), and with various industry groups such as the National Association of Securities Dealers.

Uniform Commercial Code Division

The Uniform Commercial Code Division is required under Article 9 of the Code to provide a method of giving notice of security interests in personal property to interested third parties. The method adopted is a "notice" filing system. Recorded information in the UCC Division is public record.

The Secretary of State, as central filing officer, receives and files financing statements and related "notice" statements and furnishes information to the public regarding such statements.

It is the responsibility of the secured party to file a statement showing the name and address of the debtor, the name and address of the secured party and a brief description of the collateral. These documents are indexed by the debtor's name. A search of the records on a particular debtor will produce a list of all active creditors who have filed statements with this office. Interested parties are given information sufficient to contact the creditors for further information regarding the lien.

The Secretary of State is also central filing officer for federal tax liens which are handled in the same manner as UCC filings.

The Business License Information Office

The newest addition to the Department of the Secretary of State is the Business License Information Office. Created in 1987 by the General Assembly, this office grew out of the recognition of the business community's need for relief from an often confusing licensing system, and the recognition that the time and energy of prospective business owners could be better spent in other areas. There are hundreds of business related licenses and permits issued by the State of North Carolina with hundreds of applications and related forms to be completed to obtain them. This experience can be very frustrating.

The purpose of the Business License Information Office is:

- (1) to offer new and existing businesses an accessible central information source;
- (2) to assist potential business owners to secure the necessary state issued licenses, permits, and/or other authorizations in order to operate a business in North Carolina;
- (3) to monitor the license application review process; and
- (4) to act as an advocate for regulatory reform.

Assistance is available to all businesses regardless of size, type or location. There are no fees for the services provided and assistance is available by telephoning or by visiting the office. A toll free telephone number has been established for the convenience of the users. The number is 1-800-228-8443.

A directory, the *North Carolina State Directory of Business Licenses and Permits* has been published by the office. This publication contains up-to-date information on over 600 state required licenses and permits.

The Auctioneers Law stipulates that there shall be a five-member Commission, appointed by the Governor. By law, three members are from nominations submitted to the Governor by the

Auctioneers Association of North Carolina. At least three members must be experienced licensed auctioneers; one member is appointed to represent the public at large, and cannot be licensed as an auctioneer.

It is the responsibility of the Board to license auctioneers, apprentice auctioneers, and auction firms and to see that the qualifications and activities of those engaged in auctioneering activities are in accord with the law, and in the best interest of the public. The Board is not a board of arbitration and has no jurisdiction to settle disputes between parties concerning such matters of contract as the rate of commissions, the division of commissions, pay of assistants and similar matters.

The Commission may upon its own motion or upon the written complaint of any person, provided the complaint and any evidence presented with it establishes a prima facie case, hold a hearing and investigate the actions of any licensee, and has the power to suspend or revoke any license issued. The Commission may in its own name seek injunctive relief to restrain any violation or anticipated violation of the Auctioneers Law and utilizes the services of the Attorney General's Office in enforcing the provisions of G.S. 85B.

The Commission holds monthly meetings; receives and acts upon license applications; adopts rules and regulations; investigates complaints; holds administrative hearings as needed; suspends or revokes licenses when warranted; sponsors and underwrites educational projects for the benefit of licensees, and provides recovery and guaranty protection through the Auctioneer Recovery Fund.

The Board's operational activities are supported totally by license fees collected from those in the auction profession and deposited with the State Treasurer: no funds are appropriated for the use of this agency. The Board employs a full-time staff which administers examinations, issues and renews licenses, publishes an annual directory and biannual newsletters, and is responsible for the daily functioning of the office. Complaints are investigated with the assistance of a contractual investigative firm.

The administrative offices of the Auctioneer Licensing Board are located at:

(f) The Board adopts by reference in accordance with G.S. 150B-14(c) the following parts and subparts of the Code of Federal Regulations, Title 21, Subchapter B (Food for Human Consumption), as promulgated by the Commissioner of the Food and Drug Administration under the authority of the Federal Food, Drug and Cosmetic Act:

<u>Part</u>	<u>Subject of Part</u>
(15) 129	Processing and Bottling of Bottled Drinking Water (<u>Except as amended by 2 NCAC 9C .0700 - Bottled Water</u>)

Statutory Authority G.S. 106-139; 106-267; 106-267.2.

SUBCHAPTER 9C - CURRENT GOOD MANUFACTURING PRACTICES FOR

.0701 SCOPE

(a) The source approval requirements of this Section apply to bottled water sources located within the state. Bottled water from sources located outside the state must comply with the source approval requirements of Title 21, Code of Federal Regulations, Part 129, which is adopted by reference in 2 NCAC 9B .0016(d)(15).

(b) The labeling requirements of this Section apply to bottled water offered for sale in the state.

Statutory Authority G.S. 106-139.

.0702 DEFINITIONS

For the purposes of this Section:

- (1) "Approved source" when used in reference to a plant's product or operations water, means a source of water and the water therefrom, whether it be from a spring, well, municipal water supply, or any other source that has been approved by the Department of Agriculture's designated representative, the Department of Environment, Health, and Natural Resources, Environmental Health Division, Public Water Supply Section in accordance with this Section;
- (2) "Spring" means a natural orifice in the earth's surface through which water freely flows without the aid of mechanical means;
- (3) "Well" means a hole that is cored, bored, drilled, jetted, dug or otherwise constructed so as to tap an aquifer through which water is derived by mechanical means. If the water rises to the surface on its own without aid of mechanical means due to hydrostatic pressure, the well would be an artesian well.

Statutory Authority G.S. 106-139.

.0703 SOURCE APPROVAL

(a) If the proposed source is from an existing approved public water supply system, proceed to Paragraph (e) of this Rule.

(b) If the proposed source is a well, the provisions of 15A NCAC 18C, Rules Governing Public Water Supplies, shall apply. Copies are available upon request from the Public Water Supply Section.

(c) If the proposed source is a spring, approval requires a two step process. The first step is approval of the spring site. A representative of the Department of Environment, Health, and Natural Resources shall conduct an initial site investigation. Consideration shall be given to

spring location, potential for surface water influence, hydrological and geological features, proximity of potential sources of pollution, site ownership and control and other factors which he determines to have a bearing on the suitability of the site to produce a safe water source:

- (1) If the investigation reveals influence by surface water or other factors which render the site unsuitable for development as a safe water source, the investigation shall be terminated;
 - (2) If the investigation does not reveal influence by surface waters, and all other factors are considered satisfactory for site development, proceed to Paragraph (d) of this Rule;
 - (3) If the investigation reveals factors which warrant further investigation, the Department of Environment, Health, and Natural Resources may require, as a condition for continued investigation, evaluation of the site or specific factors influencing the site by a geologist and or engineer licensed to practice in North Carolina. If the Department of Environment, Health, and Natural Resources determines that the investigation and report illustrate that the questionable factors do not hinder the suitability of the site to produce a safe water source, proceed to Paragraph (d) of this Rule.
- (d) The second step of the spring investigation requires water sampling and data collection to determine the capability of source water to meet current North Carolina drinking water quality standards under the most severe anticipated environmental conditions. The following requirements apply to the water sampling and data collection process:

- (1) Sampling and data collection shall be conducted by the spring owner or his representative for the following parameters:
 - (A) Flow in gallons per minute (on-site measurement);
 - (B) Precipitation in inches (on-site measurement);
 - (C) Temperature (on-site measurement);
 - (D) pH;
 - (E) Conductivity;
 - (F) Turbidity;
 - (G) Coliform bacteria;
 - (H) Microscopic analysis for organic debris, larvae, animal or insect parts, algae, diatoms, rotifers, coccidia and giardia cysts;
- (2) The minimum sampling and data collection period shall be six consecutive

months. The period shall also include a minimum of two storm events (two or more inches of rainfall in a 24-hour period). It is the owner's responsibility to monitor rainfall in the vicinity of the spring site;

- (3) Parameters listed as (I)(A) through (I)(F) of this Paragraph shall be monitored at least weekly on the same day of the week before a storm event occurs. After a storm event occurs, parameters (I)(A) through (I)(F) of this Paragraph shall be monitored within 24 hours and then twice a week for two weeks. Parameter (I)(G) of this Paragraph shall be monitored at least monthly plus one sample within 24 hours after each storm event. Parameter (I)(H) of this Paragraph shall be measured at least two times during the sampling period. The first analysis should be conducted early in the sampling period. At least one of the samples shall be collected within 24 hours of a storm event;
- (4) The extent to which the spring is developed before beginning the monitoring process is at the discretion of the owner. This may have a bearing on the analysis results, and some spring site improvement may be advisable. Unfavorable sample results will not be discounted on the basis of inadequate spring development at the time of sample collection. The owner may wish to obtain the advice of an engineer or other consultant. If the owner intends to develop the spring in its final form before monitoring, he shall complete the requirements of Paragraph (e) of this Rule prior to construction;
- (5) These measurements and analyses shall be conducted in accordance with the recommendations of the current edition of "Standards Methods for the Examination of Water and Wastewater" and at a laboratory certified by the State of North Carolina for parameters (I)(D) through (I)(H) of this Paragraph. All measurements and sample results (with attached laboratory analysis reports) shall be kept in a neat tabular form and submitted to the Department of Environment, Health, and Natural Resources at the end of the monitoring period. The spring owner may consult with the Department of Environment, Health, and Natural Resources at any point during the monitoring period. Upon review of the data and sample results, the Department of Environment, Health, and Natural Re-

sources shall determine the capability of the source to meet current North Carolina drinking water quality standards. If the water source is determined to be unsatisfactory, the investigation shall be terminated. If the source is determined to be satisfactory, proceed to Paragraph (e) of this Rule.

(e) Plans and specifications for construction of the source, protective covering, piping, and storage facilities shall be submitted to the Department of Environment, Health, and Natural Resources by an engineer licensed to practice in the State of North Carolina for review and approval prior to beginning construction or letting a contract. For spring sources, the plans and specifications may be presented by the licensed engineer at any point during the process outlined in Paragraph (d) of this Rule. Springs shall not be constructed to the final intended form until plans and specifications for the spring have been approved.

(f) The bottling of water or the selling of water for bottling shall not begin until compliance with this Section has been completed and the Department of Environment, Health, and Natural Resources receives certification from an engineer licensed to practice in North Carolina that the project has been constructed in accordance with the approved plans and specifications.

Statutory Authority G.S. 106-139.

.0704 LABELING

Bottled water which uses the word "spring" or "well" in its labeling to describe the product, other than in a trade name or company name, shall be deemed to be misbranded unless the source of such water conforms to the definitions of those terms in Rule .0702 of this Section.

Statutory Authority G.S. 106-139.

(i) Alternative 1 shall be as follows:

(I) A second bottom made of compatible material shall be constructed for the storage container. The second bottom shall be placed over the original bottom and over a layer of smooth, fine gravel or coarse sand having a minimum thickness of three inches;

(II) The original bottom of the storage container shall be tested for leaks be-

fore the sand layer and second bottom are installed. A record of the test shall be kept on file at the storage facility;

(III) The newly constructed bottom shall be tested for leaks before any fluid fertilizer is stored on the newly constructed bottom. A record of the test shall be kept on file at the storage facility or at the nearest local office from which the storage facility is administered;

(IV) There shall be a system to readily detect leaks through the newly constructed bottom into the sand layer;

(V) The newly constructed bottom shall be tested at least once every five years for leaks. A record of the tests shall be kept at the storage facility;

(ii) Alternative 2 shall be as follows:

(I) The container shall be emptied, cleaned, and tested for leaks. The walls and floor of the container shall be tested to assure that welds and thickness of steel plates are sound and adequate to contain the fertilizers. A record of the inspection, test results, and of any repairs made shall be submitted to the Commissioner and maintained by the owner or operator;

(II) The interior floor and wall areas of the container shall be coated with an approved liner to inhibit corrosion. A record of this procedure shall be submitted to the Commissioner and maintained by the owner or operator;

(III) An approved test for leaks and liner deterioration or metal corrosion shall be conducted every five years thereafter. A record of the test findings of indicated repairs and maintenance shall be maintained by the owner or operator;

(iii) Alternative 3 shall be as follows:

(I) Monitoring devices shall be installed in angled borings under each tank. These monitoring devices shall constitute a leak detection system for each tank in advance of the point at which any leak would reach groundwater;

(II) The number, length, and depth of each boring shall be determined on the basis of site characteristics. The array of monitoring devices under each tank shall constitute the best

practical early warning detection system for tank leakage;

(III) Each monitoring plan under this alternative shall be implemented only upon review and approval of the Commissioner;

(B) The secondary containment requirements under this Section do not apply to rail cars which are periodically moved from the storage facility;

(6) New construction of containers of 100,000 U. S. gallons or more:

(A) This Regulation shall apply to all storage containers of 100,000 U. S. gallons or more which are constructed or placed in service after the effective date of this Regulation;

(B) Liquid fertilizer storage containers with a capacity of 100,000 U. S. gallons or more shall be:

(i) Located within a diked and paved area designed to allow the containment and recovery of any discharged fertilizer material; and

(ii) Placed on a surface which has been sealed with asphalt, concrete, attapulgitic clay, sodium bentonite, or other material approved by the Commissioner;

(C) The bottom surface of the storage container shall be elevated above the surrounding surface of the containment area so that the lowest point of the storage container shall be at least six inches above the sealed surface to permit installation of a leak detection system;

(D) The leak detection system shall consist of three or more perforated pipes or tile which shall:

(i) Be placed on the sealed surface and below the storage container;

(ii) Be placed parallel to each other on not more than ten foot centers; and

(iii) Extend to the outer edge of both sides of the tank;

(E) Any other detection system approved by the Commissioner;

(F) Each storage container shall be located within a secondary containment area which has been designed to permit both visual and sampling access to the leak detection system.

(c) Use of elephant rings in lieu of a diked containment area:

(1) Individual storage containers may be contained within a secondary storage container ("elephant ring") in lieu of a diked containment area. The "elephant ring"

serves as a second containing wall in the event that the primary storage container develops a leak;

(2) Both the primary storage container and the "elephant ring" shall be fabricated of material compatible with each other and with the fertilizer being stored. Dissimilar metals between the primary storage container and the "elephant ring" contribute to electrolytic corrosion and such use is prohibited, unless provisions are made to prevent such corrosion;

(3) The height of the "elephant ring" wall shall not exceed four feet unless provisions are made for escape should flooding occur. The elephant ring shall contain a volume 15 percent greater than the volume contained in the primary storage container plus the volume displaced by the footings of any equipment (i.e., pumps, meters, etc.) placed within the secondary vessel;

(4) The "elephant ring" shall be free of leaks and structural defects. The base shall be protected from corrosion, both from inside and outside, and shall be underlain by a concrete pad or with eight inches of compacted gravel beneath four inches of compacted sand, or clay, or as recommended by the manufacturer of the "elephant ring" and approved by the Commissioner;

(5) All piping connections to the primary storage container shall be made over the wall of the "elephant ring" and shall be adequately supported and braced. Pumps and other fixtures, if located within the "elephant rings" containment structure, shall be placed on an elevated platform above the top of the elephant ring or otherwise protected from flooding;

(6) Accumulation of storm water and other material shall be pumped over the wall of the "elephant ring" by means of a sump pump within the secondary container, or by means of an exterior portable pump, and used for make-up water or proper disposal.

(d) Drainage from contained areas within dikes:

(1) Earthen or prefabricated diked area. An earthen or prefabricated diked area shall not have a relief outlet and valve. The base shall slope to a collecting spot where storm water can be discharged by pump over the berm, into a holding tank within a dike for use in the blending process, field applied at agronomic rates, or for proper

disposal in accordance with local requirements for disposal of storm water;

- (2) Asphalt or concrete lined areas. Asphalt or concrete lined areas shall have a recessed catch drain running through the center of the base or, as an alternative, a sump as provided for in Subparagraph (c)(6) of this Rule.

.0207 STORAGE AND HANDLING OF DRY BULK FERTILIZER

(a) Dry fertilizer materials shall be stored and handled in a manner to prevent pollution by minimizing losses to the air, surface water, ground water, or subsoil.

(b) Non-fluid fertilizers shall be stored inside a sound structure or device having a cover or roof top, sidewalls, and base sufficient to prevent contact with precipitation and surface waters. If stored outdoors, it shall be covered with a tarpaulin or other suitable covering to prevent seepage or runoff.

(c) All loading, unloading, mixing and handling of dry fertilizer, unless performed in the field of application, shall be done by using a containment method, device or structure of a size and design that will contain the fertilizer and operate to minimize emission of dust and or vapors beyond the facility boundaries. Any collected materials shall be applied at agronomic fertilizer rates or otherwise recycled.

(d) Containment devices or structures include, but are not limited to, the following methods:

- (1) Paving and curbing of outdoor handling areas with materials which allow for collection and recycle of spilled products. Such pad shall be designed to eliminate flow of surface water onto the pad;
- (2) Enclosing conveyors and equipping conveyors with dust control boots. Manually extendible boots may be adaptable to up-right and auger type conveyors;
- (3) Daily cleanup of the outside areas when in use.

- (1) The identity and telephone number of the persons or agencies who are to be contacted in the event of a discharge, includ-

ing persons responsible for the stored fertilizer; and,

- (2) For each bulk fertilizer or raw material stored at the facility, a current copy of the material safety data sheet will accompany the "discharge response plan";

CHAPTER 20 - EMPLOYMENT AND TRAINING

SUBCHAPTER 20A - GENERAL PROVISIONS

.0002 APPLICABILITY OF RULES

The rules in Chapter 20 govern the funding, selection, designation, administration and operation of grants, subgrants, contracts and subcontracts funded by federal and state employment and training grants administered through the Division. Provisions in these Rules apply to individuals and entities that receive or desire to receive these grant funds, directly or indirectly, except that employment relationships and agency relationships between the Division and its employees, employees of the Department's Administrative Hearing Office, employees of the Department's Office of Legal Affairs, the Private Sector Policy Coordinator and the designated attorney in the Office of the Attorney General for the division, shall not be considered contracts or subcontracts under Chapter 20.

Statutory Authority G.S. 143B-10; 143B-276.

SUBCHAPTER 20B - ADMINISTRATIVE PROVISIONS

SECTION .0900 - EMPLOYMENT AND TRAINING GRANT PROGRAM

.0901 PURPOSE

The purpose of this state funded program is to make grants available to local agencies operating on behalf of the Private Industry Council serving Job Training Partnership Act service delivery areas. Funds shall be used to upgrade the foun-

dation of basic skills of the adult population and the existing workforce in North Carolina.

Statutory Authority G.S. 143B-438.6.

.0902 GRANT APPLICATIONS

Service delivery areas will submit plans for the use of these funds as part of the Job Training Plan, in accordance with Rule .0201 of this Subchapter.

Statutory Authority G.S. 143B-438.6.

.0903 ALLOCATION OF GRANTS

The Division may reserve and allocate up to five percent of funds available to the Employment and Training Grant Program for state and local administrative costs to implement the program. The Division of Employment and Training shall allocate employment and training grants to local agencies operating on behalf of the Private Industry Council serving Job Training Partnership Act service delivery areas based on the following formula:

- (1) One half of the funds shall be allocated on the basis of the relative excess number of unemployed individuals residing in each county as compared to the total excess number of unemployed individuals in all counties in the state for the most current 12 month data. "Excess number of unemployed" is defined as the number of unemployed individuals in excess of four and one-half percent of the civilian labor force in each county or the number of unemployed individuals in excess of four and one-half percent of the civilian labor force in each census tract within the county. The following methodology is used to determine the excess number of unemployed:
 - (a) For counties classified as having excess unemployment, the excess number of unemployed is determined by subtracting four and one-half percent of the civilian labor force from the number of unemployed individuals within the county. The difference equals the number of excess unemployed.
 - (b) In situations where the entire county is not classified as having excess unemployment, the excess number of unemployed is determined by census tract unemployment within the county. Census tract data is used to determine which subcounty areas qualify as areas of excess unemployment. In those subcounty areas classified as having excess unemployment (census tracts with four and one-half per-

cent or higher unemployment rates), four and one-half percent of the census tract labor force is subtracted from the number of unemployed individuals within the area of excess unemployment. The subcounty figures of excess number of unemployed within the county are then added together to determine the total excess number of unemployed within the county.

- (2) One half of the funds shall be allocated on the basis of the relative number of economically disadvantaged individuals within each county compared to the total number of economically disadvantaged individuals in the state. To determine the number of economically disadvantaged individuals within each county, data from the State Data Center in the Office of State Budget and Management, or from the federal decennial census, whichever is most recent, shall be used.

Statutory Authority G.S. 143B-438.6.

.0904 COORDINATION WITH OTHER EMPLOYMENT AND TRAINING FUNDS

These funds will become part of the strategic process implemented through the Governor's Coordination Criteria and the strategic planning process used for development of Job Training Plans by the Private Industry Councils. These PICs combine the private sector and public sector in an employment and training service delivery system that is based on local control, local problem solving, coordination of services and accountability.

Statutory Authority G.S. 143B-438.6.

.0905 ELIGIBILITY

Individuals served must be 18 years of age or older and must either meet the current Job Training Partnership Act definition of economically disadvantaged or meet the current definition for eligibility under Title III of the Job Training Partnership Act.

Statutory Authority 143B-438.6.

.0906 USE OF FUNDS

Services that may be provided include participant programs currently available under the federal Job Training Partnership Act that are appropriate for adults. Services include but will not be limited to on-the-job training, work experience, adult basic education, skill training, upgrading and retraining, counseling and screening for job placement, service corps, and sup-

portive services necessary to enable individuals to participate in the program and to assist them in retaining employment for a period of one service year following completion of training. PICs have flexibility to use funds to fill gaps in current training/self-sufficiency services.

Statutory Authority G.S. 143B-438.6.

.0907 COST LIMITATIONS/CATEGORIES

Administrative costs will be limited to five percent of allocation. Definition of administrative costs is:

 - (b) Related materials, supplies, equipment, office space, costs, and travel.
- (2) **TRAINING COSTS.** All non-administrative costs shall be charged as training costs.

Statutory Authority G.S. 143B-438.6.

The Division will report quarterly to the Governor and to the Speaker of the House of Representatives and the President Pro Tempore of the Senate. The State Job Training Council shall receive quarterly reports on fund utilization.

Statutory Authority G.S. 143B-438.6.

.0909 PERFORMANCE STANDARDS

Local performance measures will be established during the planning process and may include: entered employment rate at termination; average wage at placement; welfare entered employment rate at termination; number of participants receiving GED/high school equivalency; and number of participants that return to full time school.

Statutory Authority G.S. 143B-438.6.

(a) Depredation Permit:

- (1) Endangered or Threatened Species. No permit shall be issued to take any endangered or threatened species of wildlife listed under 15A NCAC 10I by reason of depredations to property. An individual may take an endangered or threatened species in immediate defense of his own life or of the lives of others without a permit. Any endangered or threatened species which may constitute a demonstrable but nonimmediate threat to human safety shall be reported to a federal or state wildlife enforcement officer, who, upon verification of the report, may take or remove the specimen as provided by 15A NCAC 10I .0002.
- (2) Other Wildlife Species. Except as provided in Subparagraph (1) of this Paragraph, the executive director of the

Wildlife Resources Commission may, upon application of a landholder and after such investigation of the circumstances as he may require, issue a permit to such landholder to take any species of wildlife which is or has been damaging or destroying his property provided there is evidence of substantial property damage. No permit may be issued for the taking of any migratory birds and other federally protected animals unless a corresponding valid U.S. Fish and Wildlife Service depredation permit has been issued. The permit shall name the species allowed to be taken and, in the discretion of the Executive Director, may contain limitations as to age, sex or any other condition within the species so named. The permit may be used only by the landholder, except that, upon written request of the landholder and when it is conclusively determined on the basis of information submitted by him that he is incapable of accomplishing the necessary control without help, the names of additional persons may be entered upon the permit by the Executive Director as authorized users.

- (3) Taking Without a Permit. Except as provided in Subparagraph (1) of this Paragraph, a landholder may take wildlife except migratory birds and other federally protected animals upon his own land without a permit during closed season on the species involved only when such wildlife is in the act of damaging or destroying the property of such landholder.

(b) Term of Permit. Each depredation permit issued by the Executive Director shall have entered thereon a date or time of expiration after which date or time the same shall become invalid for any purpose, except as evidence of lawful possession of any wildlife that may be retained thereunder.

(c) Manner of Taking:

During the closed season such depredating wildlife may be taken without a permit only by the use of firearms.
- (2) Taking With a Permit. Wildlife taken under a depredation permit may be taken only by the method or methods specifically authorized by the permit. The only methods that may be authorized in taking game species, other than foxes, is by the

use of firearms and live traps. The permit may authorize the taking of foxes, furbearing animals, and nongame animals or birds by the use of firearms or traps, including steel traps. When trapping is authorized, in order to limit the taking to the intended purpose, the permit may specify a reasonable distance from the property sought to be protected, according to the particular circumstances, within which the traps must be set. The Executive Director may also state in a permit authorizing trapping whether or not bait may be used and the type of bait, if any, that is authorized. In addition to any trapping restrictions that may be contained in the permit the method of trapping must be in accordance with the requirements and restrictions imposed by G.S. 113-291.6. No depredation permit shall authorize the use of poisons or pesticides in taking wildlife except in accordance with the provisions of the North Carolina Pesticide Law of 1971, the Structural Pest Control Act of 1955, and Article 22A of Chapter 113 of the General Statutes of North Carolina. use of the edible portions of the carcass. The nonedible portions of the carcass, including head, hide, feet, and antlers, shall be disposed of as specified in Subparagraph (1) of this Paragraph or turned over to a wildlife enforcement officer for disposition. When a deer is accidentally killed on a road or highway by reason of collision with a motor vehicle, the law enforcement officer who investigates the accident shall, upon request of the operator of the vehicle, provide such operator a written permit authorizing him to possess and transport the carcass of such deer for his personal and lawful use, including delivery of such carcass to a second person for his private use upon endorsement of such permit to such person by name and when no money or other consideration of value is received for such delivery or endorsement.

(c) If a hearing is conducted and a decision is reached in an administrative hearing in the absence of a party, that party may file a written petition with the Board for a reopening of the case.

(d) Petitions for reopening a case will not be granted except when the petitioner can show that the reasons for his failure to appear were justifiable and unavoidable and that fairness requires reopening the case. Such petitions, however, will have no effect on the running of the 30-day period for seeking judicial review, which starts from the day the party is served with the final decision.

(d) Any person receiving a subpoena from the Board may object thereto by filing a written objection to the subpoena with the Board's office.

(e) Such objection shall include a concise, but complete, statement of reasons why the subpoena should be revoked or modified. These reasons may include lack of relevancy of the evidence sought, or any other reason sufficient in law for holding the subpoena invalid, such as that the evidence is privileged, that appearance or production would be so disruptive as to be unreasonable in light of the significance of the evidence sought, or other undue hardship.

(f) Any such objection to a subpoena must be served on the party who requested the subpoena simultaneously with the filing of the objection with the Board.

(g) The party who requested the subpoena, in such time as may be granted by the Board, may

(h) After receipt of the objection and response thereto, if any, the Board shall issue a notice to the party who requested the subpoena and the party challenging the subpoena, and may notify any other party or parties of an open hearing, to be scheduled as soon as practicable, at which time evidence and testimony may be presented, limited to the narrow questions raised by the objection and response.

(i) Promptly after the close of such hearing, the majority of the board members hearing the contested case will rule on the challenge and issue a written decision. A copy of the decision will be issued to all parties and made a part of the record.

(b) Any exceptions to the procedure during the hearing, the handling of the hearing by the administrative law judge, rulings on evidence, or any other matter must be written and refer specifically to pages of the record or otherwise precisely identify the occurrence to which exception is taken. The exceptions must be filed with the Board within 10 days of the receipt of the proposal for decision. The written exceptions must bear the notation: EXCEPTIONS TO THE PROCEEDINGS IN THE CASE OF (Name of Case).

(d) Upon receipt of request for further oral argument, notice will be issued promptly to all parties designating the time and place for such oral argument.

(e) Giving due consideration to the proposal for decision and the exceptions and arguments of the parties, the Board may adopt the proposal for decision or may modify it as the Board deems necessary. The decision rendered will be part of the record and a copy thereof given to all parties. The decision as adopted or modified becomes the "final agency decision" for the right to judicial review. Said decision will be rendered by the Board within 60 days after the next regularly scheduled meeting following the oral arguments, if any.
